PROFESSIONAL EXPERIENCE

MERIT RESOURCES, SQL Server Database Administrator (*Mar 2009 to present*)

- Support and Maintain Microsoft Dynamics GP and CRM Application and Databases
- Build and support reports using SSRS and Crystal Reports
- Create and maintain SSIS packages for data import and export
- Backup, Restore, and Upgrade LOB applications
- Support and Maintain several instances of SQL Server from 2000 to 2008R2
- Build Business Intelligence applications using OLAP cubes and SSAS
- Build Maintain Transactional Replication Between Dynamics, CRM, and a Data Warehouse
- Administer and Maintain an Oracle 10g database
- Currently Building a self-serve reporting tool using SharePoint
- Currently Implementing a SharePoint intranet

RUAN TRANSPORTATION, Programmer/Analyst (*Jan 2006 to Feb 2008*)

- Implemented a new intranet using WSS 3.0 & MOSS 2007
- Create custom work flows using C#.NET in Visual Studio 2008
- Support various web applications using C#.NET
- Create new functionality to meet business needs for SharePoint 2007
- Implement and maintain security in SharePoint 2007 using AD and SharePoint built in security
- Create and publish reports Using SSRS
- Create queries and stored procedures in SQL Server 2005
- Create OLAP cubes using SQL Server 2005 analysis services
- Create and maintain ETL using SSIS
- Enhance process workflows to insure requirements meet report user and designer needs.
- Work closely with business analysts to create new operational reports

REGENCY HOMES, Programmer/Analyst (*Dec 2005 to Dec 2006*)

- Create and publish reports on intranet using Crystal Reports, ASP.NET C# Visual Studio
- Create queries and stored procedures in SQL Server 2000
- Develop and maintain a data warehouse for all company applications
- Create and maintain various applications using .NET framework
- Maintain existing reports in Microsoft Access

ING (*July 1998 to Dec 2005*)

BUSINESS FORMS ANALYST (*July 1998 to Dec 2005*)

- Manage forms and fonts for ING Americas to include design and modification
- Write various web applications using ASP, VB, & Visual C#.net
- Program statements using ExStream (dialogue) software
- Develop and maintain print streams using a variety of tools and software

Projects included:

- Worked with a team to develop an e-commerce web site, which encapsulated all of our shipping, receiving, purchasing, and ordering processes. This was accomplished through the use of ASP, Java Script, Visual Basic, SQL and HTML.
- Wrote SQL scripts which supported our inventory management team, provided accurate data, and fulfilled inventory requests.
- Worked with ING mutual funds to establish a connection with our Oracle database enabling them to process purchase orders through our system.
- Used PERL to extract data from a web page and transfer it to an Access database. The end product printed variable data on preprinted forms.
- Worked with a team from a subsidiary division to ftp data from an Access database to our Oracle database. Enabled us to support their business on our system giving us data integrity and efficiency.
- COBOL and VIPP (Variable Intelligent Postscript Programming): Learned VIPP (Variable Intelligent Postscript Programming language) utilizing manuals, tutorial cd's, and communication with technical support.
- Successfully taught VIPP to our IT department to resolve tax printing problems and to print 1099 tax forms using variable data. At the suggestion of the IT team, I became proficient in COBOL, so that COBOL and VIPP could be combined to create a system that would generate print from data that was created in COBOL.
